

Health: Everyone's Business

Course Evaluation

HEALTH: EVERYONE'S BUSINESS

Course Evaluation

Following the completion of the programme, may we now ask you to complete this evaluation form. Your comments are important to us, as we would like to know whether your learning needs were met as well as help us when planning future courses of a similar nature.

The aims of the programme were to deliver a six day training programme for local authority staff, who influence council policy that will increase the knowledge, skills and language to promote health within key Council roles.

All underpinned by learning about surveillance, monitoring of health and the determinants of health.

How well did this training meet your learning objectives?

Having attended the programme, what skills will you use in the future?

What specific differences (if none, state none) to the way you do your job have happened as a result of this programme?

Have there been any other effects, for example, on your career thoughts?

Please add any additional comments, which can help us.
